Private Sector Investment Survey (PSIS) 2011

A. Background

1. Introduction:

Bank of Uganda (BOU), in conjunction with Uganda Bureau of Statistics (UBOS) and Uganda Investment Authority (UIA), are conducting the tenth survey on Private Sector Investment in Uganda. The survey will collect data on private capital, which includes stocks for the calendar years 2009 and 2010, flows during 2010 and Investor Perceptions for the year 2011.

The results of the previous surveys can be accessed or downloaded from the following websites: <http://www.bou.or.ug>, <http://www.ubos.org>, and <http://www.ugandainvest.com> or through formal requests for printed copies from the Director, Statistics Department, BOU.

2. How do you benefit?

The regular PSISs' are a rich source of information that facilitates effective planning and policy formulation, which benefits both the public and private sectors.

3. Why do we need to collect this information?

The information is a key input in the compilation of Uganda's Balance of Payments (BOP) and the International Investment Position (IIP) statistics. D. Definitions

This questionnaire contains technical terms of which are explained below in the context in which they are used. However, if you still encounter problems, and/or are uncertain of any terms or questions, please do not hesitate to call or email us for clarification (*please refer to contacts under Guideline No.5, Page iii for any assistance*).

1. Residency

In this questionnaire, Parts 1, 2, 3 and 4 are interested in operations between residents and non-residents only. Note that Residency is based on the centre of the economic/business interest. You are a resident if you have lived or operated (or intend to live or operate) in Uganda for a year or more, regardless of your nationality. Non-resident individuals or entities are those that have lived or operated (or intend to live or operate) outside Uganda's territory for a year or more (even if they are Ugandan). International Organisations that have shareholders who are governments such as the East African Development Bank (EADB), African Development Bank (AfDB), International Finance Corporation (IFC) etc should be treated as non-residents.

2. Investment relationship

A direct investment relationship arises when an investor resident in one economy makes an investment that gives control or a significant degree of influence on the management of an enterprise that is resident in another economy. **Control** is determined to exist if the direct investor owns more than 50 per cent of the voting power in the direct investment enterprise (also called a subsidiary). A significant degree of **influence** is determined to exist if the direct investor owns from 10 to 50 percent of the voting power in the direct investment enterprise (also called associate). Therefore, Direct Investment is defined as any ownership stake held by a non-resident in your entity that is 10% or more of total equity. The control or influence may be immediate (through ownership of voting power) or indirect (through ownership of enterprises that in turn have voting power). Ownership in your entity by non-residents that is less than 10% of the total equity is considered as **Portfolio Investments (PI)**.

However, there are other investment relationships that are also of interests. These include your entity owning more than 10% of the total equity of a non-resident investor that in turn holds less than 10% of your equity stake. The 10% holding by such a non-resident investor is referred to as reverse investment and the non-resident investing enterprise is called a **Direct Investment Entity (DIE)**.

In addition the survey is interested in obtaining information about non-resident investors who have less than 10% of the entity's equity but are also owned by another non-resident entity that has interest in your entity. Your entity and the non-resident investing entity with less than 10% of total equity are referred to as **Fellow Enterprises (FE)**. These relationships are required in **Tables 1.3, 2.2, 3.1, 3.2, 3.3, 4.1 and 4.2**.

3. Book Value (Nominal)

Tables 2.1, 2.2 and 4.1 require reporting on the basis of book values. **Book value** comprises of paid up share capital (at historical cost), share premium reserves, accumulated retained earnings, revaluation and any other financing item of an entity. These items should be readily available from

your entity's financial statements. Accountants and financial managers refer to this as 'shareholders' funds' or 'owners equity'.

4. Inter-company transactions

This is requested for in ***Tables 3.1 and 3.2*** for foreign debt liabilities, and ***Tables 4.2*** for foreign debt assets owned by resident entities. These are borrowings or lendings between your entity, and **affiliated** (i.e., not independent) non-resident entities where a shareholding relationship exists (e.g., head offices, branches, associate entities, subsidiaries). Note that, this should include **trade credits** (buyers' and suppliers' credit) if the transaction were between related entities.
